

Quality Policy

Cirteq Limited is committed to complying with and continually improving the effectiveness of its quality management system to satisfy the company goals and the needs of its customers and other interested parties. Measurable quality objectives are established and reviewed at regular intervals to ensure that its customer's requirements are met on time, to specification and in a cost effective manner.

Adherence to the quality system involves all the Company's activities and employees. Employees are responsible for the quality of their own work and are committed to participate in the effective and safe operation of the system. They are actively encouraged to take ownership of their own areas and to initiate improvements wherever possible

The policies and procedures defined by the Cirteq quality management system are based upon the requirements of Current UK legislation, IATF 16949:2016, risk management, customer specific requirements and to a commitment to achieve continual improvement.
