REACH ROHs Proposition 65 Declaration

Registration, Evaluation, Authorisation & restriction of Chemicals (REACH) REACH is a regulation of the European Union, adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals, while enhancing the competitiveness of the EU chemicals industry.

REACH defines an article as an object which during production is given a special shape, surface or design that determines its function to a greater degree than its chemical composition. The candidate list of substances now effect **clothing, flooring, furniture, jewellery, fastenings, plastic, rubber, plasticisers, coating products, flame retardants, paints, pulp, paper, packaging, adhesives, inks, toners, washing and cleaning products.**

Manufacturers, importers, or anyone who places products in the EU market must comply with REACH Annex XVII requirements, including ensuring that the concentration level of regulated substances is kept under the prescribed limit. Thus, products that contain restricted substances above the set limitations, can't be placed (as in sold) in the EU market.

Currently, REACH Annex XVII restricts the use of some phthalates to a maximum of 0.1% by weight in plasticized materials, including: DEHP, DBP, BBP and DIBP.

Please visit the ECHA website for more details.

REACH was last updated on the 23rd of January 2024 with an additional five substances.

Companies are responsible for managing the risks of these chemicals and must also give their customers and consumers information to use them safely.

I hereby confirm that parts supplied Cirteq Ltd comply with REACH Regulations SVHC (Substances of Very High Concern) and will inform you of any substance's presence above the threshold **allowed 0.1% w/w.**

I also declare that the company complies with the RoHS Directive 2015/863/EU and 2011/65/EU RoHS 2.

I further declare that the company meets the criteria laid down in the Proposition 65 (State of California) and supply no parts with substances which are known to cause cancer & reproductive toxicity.

Signed on behalf of Cirteq Ltd
