Made in Europe

In close cooperation with our customers, we are constantly developing and manufacturing new products tailored to their needs - in our own companies.

Factories

Cirteq Limited

Production of fastening elements, retaining rings and push on fasteners

We have been manufacturing high quality fasteners and retaining rings for a wide range of industries at our Glusburn factory since 1939. Cirteq has the widest range of retaining rings in the world. Under the Starlock® brand, we also sell a wide range of push on fasteners and the corresponding processing tools. We also manufacture individual precision stamped parts und the Starpress brand name. The solutions produced here are used successfully all over the world.

Cirteq Limited - Subsidiary Tipton

Production of lockbolt systems

Near Birmingham, in the West Midlands region of England, our subsidiary Titgemeyer UK develops and produces high-quality LockBolt systems. In an area of over 1,700 m², 13 employees work in production, quality control and administration. The solutions manufactured here are used worldwide.

RIEKO GmbH

Production of roller shutters, roller grilles, roller doors, scissor grilles and folding shutters

Founded in 1963, RIEKO specialises in roller shutters and their accessories. The production and product range is expanded to include aluminium constructions.

Titgemeyer Tools & Automation spol s.r.o.

Production of tools and automation solutions

The factory based in Pisek has been part of the Titgemeyer Group since 2000. It specializes in the development and productions of high-quality riveting tools with pneumatic-hydraulic and electro-hydraulic drives. Customized, automated systems and production lines are also part of the company's range of services.
